Flag Status: Flagged

Dear Mr. Bianco,

I urge you to reject the fracked gas power plant proposed for Burrillville. Simply put, this power plant would take Rhode Island in the wrong direction.

There are serious concerns about local air and water pollution wherever a fracked gas power plant is built and operates, resulting in environmental and health concerns. If built, this plant would use thousands of gallons of Rhode Island's water sources and generate huge amounts of wastewater every single day. And it would promote fracking and accelerate climate change. Moreover, energy analysis and grid operators have proven that there isn't even a demand in the region for this power plant.

Burrillville residents deserve better than this fracked gas Invenergy plant. Rhode Islanders' future deserves better, too.

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Sincerely,

Diana Razzano
1432 victory highway
Oakland RI, 02858-1016

Seriously we have 12 years to turn around our fossil fuel consumption or the entire human race may very well go extinct within the lifespan of people currently living in our communities. We do not need a new fossil fuel plant to be adding to that.

Protect our climate, our water, and the next generation of Rhode Islanders by rejecting Inenergy's Burrillville Power Plant proposal.

Dear Mr. Bianco,

In this age of solar and wind energy, I'm mystified at the desire to build this monster here in the beautiful country. Clearly this is being proposed to just make money for people that a) do not care about the environment, b) are not even residents of our town, and c) have no inner voice or morals about destroying nature. I do not want this built here, or anywhere else. It's just NOT needed.

I urge you to reject the fracked gas power plant proposed for Burrillville. Simply put, this power plant would take Rhode Island in the wrong direction.
